Task 4. Enable APIs and services

Score: 0 / 100

13m left

Lab setup

Click **Check my progress** to verify the objective.

✓

Enable the Dialogflow API

Check my progress

Assessment Completed!

If you're interested in learning more about APIs, refer to the [Google APIs Explorer Directory](#). The lab, [APIs Explorer: Qwik Start](#), also provides hands-on experience with the tool, using a simple example including traffic levels, error rates, and even latencies, which helps you quickly triage problems with applications that use Google services.

Test your understanding

Answer the following multiple-choice question to reinforce your understanding of the concepts covered so far.

✓

When you start a lab, you need to enable APIs in your project to start working with Google Cloud.

✓ False

☐ True

Submit
